

As scheduled, join us today at noon!

Trauma at the Border

What can neuroscience tell us about the effects of the trauma of navigating an increasingly hostile immigration system on the brains of children and adults?

Monday, March 4, 12pm · HLS, Wasserstein Hall, Milstein East B (2036)

HARVARD LAW SCHOOL Part of the Project on Law and Applied Neuroscience, a collaboration between the Center for Law, Brain & Behavior at MGH and the Petrie-Flom Center for Health Law Policy, Biotechnology, and Bioethics at Harvard Law School. MASSACHUSETTS GENERAL HOSPITAL CENTER FOR LAW, BRAIN & BEHAVIOR

Record numbers of children and families seeking to enter the United States face an increasingly hostile immigration system. Can neuroscience help us understand how the trauma of violence and separation affect the brain? Might neuroscientific evidence be effectively introduced into legal cases? Does neuroscience have a larger role to play in shaping our nation's immigration policies? Join us for this special lunchtime event as we begin a dialogue between scientists and lawyers on neuroscience, trauma, and justice.

Date: Today, March 4, 2019

Time: 12:00-1:30pm

Location: Wasserstein Hall, Milstein East B (2036), Harvard Law School, 1585 Massachusetts Avenue, Cambridge, MA

Panelists:

Charles Nelson, III, PhD, Professor of Pediatrics, Harvard Medical School and Director of Research, Developmental Medicine Center, Boston Children's Hospital

Cindy Zapata, JD, Lecturer on Law and Clinical Instructor, Harvard Immigration and Refugee Clinical Program, Harvard Law School

Francis Shen, PhD, JD, Executive Director, Center for Law, Brain, and Behavior, MGH; Senior Fellow in Law and Applied Neuroscience, CLBB & Petrie-Flom Center, HLS
