Meet CLBB's Project Director! Introducing Stephanie Tabashneck

The MGH Center for Law, Brain & Behavior is excited to announce our Project Director for 2023: Stephanie Tabashneck.

As Project Director, Stephanie will be primarily responsible for the Brain InCite Digital Library Project.

Stephanie Tabashneck, PsyD, JD is a psychologist and attorney, and has been involved with the Center for Law, Brain & Behavior since 2016. She is a Senior Fellow of Law and Applied Neuroscience at CLBB and the Petrie-Flom Center at Harvard Law School.

We are excited to announce that Dr. Tabashneck is the founding Project Director for the newest initiative at CLBB, the Brain InCite Digital Library. Brain InCite will provide educational resources and training programs for judges, attorneys, legislators, policy analysts, advocates, incarcerated individuals, students, and academics in four core areas: juvenile and emerging adult justice, the neuroscience of trauma, sentencing reform, and the aging brain. The first phase of the project will focus on juvenile and emerging adult justice. The platform will empower legal and policy professionals with the latest knowledge and skills in legal neuroscience and improve the quality of justice and policy.

"The current legal system stacks the deck against the most marginalized in our society including people of color and those with insufficient resources. Brain InCite will help level the playing field for public defenders and unrepresented litigants by providing curated, actionable, open source information that is freely accessible to all regardless of ability to pay."
