Meet CLBB's Project Director! Introducing Caitlyn Tabor

The MGH Center for Law, Brain & Behavior is excited to announce our Project Director for 2023: Caitlyn Tabor.

As Project Director, Caitlyn will be primarily responsible for the Elder Protection Project in our Aging Brains core area, and for the project on trauma-informed asylum proceedings in our Trauma at the Border core area. This moves her from Senior Research Associate to Project Director.

Caitlyn Tabor, JD joined the Center for Law, Brain & Behavior as a Research Assistant in Summer 2022. Following that experience, she remained at CLBB as a Senior Research Associate and has now transitioned to Project Director of the Aging Brains/Elder Protection, UNITAR (United Nations international comparative neurolaw curriculum), and Asylum/Immigration projects. Outside of her work at CLBB, Caitlyn is a Fellow for the Neuroethics Hub at Harvard Medical School, a Master of Bioethics candidate at Harvard Medical School, and an adjunct professor of health law, bioethics, and public health policy at New York's Renaissance School of Medicine (Stony Brook University). Caitlyn's recent scholarship centers on how justice can practically be achieved through the reform of health policy and legal policy. She is passionate about protecting human rights and is attentive to the importance of diversity and inclusion in achieving meaningful legal and public health outcomes.
